

nxFAST Platform Services

Network-as-a-Service for the IoT

Reduce the complexity of managing multiple carriers, networks, accounts and subscriptions with Network-as-a-Service. This nxFAST Platform Service gives service providers, enterprises, and partners these value added benefits:

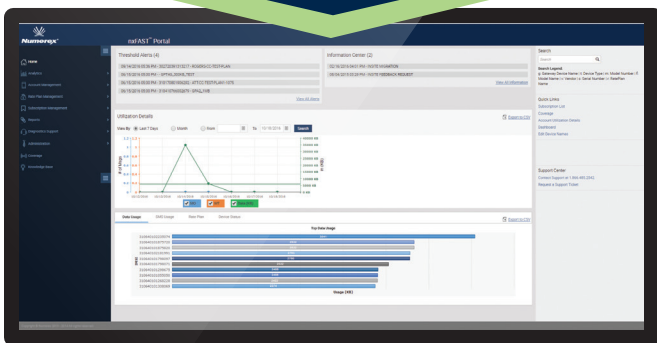

- Secure access to a full-featured account and subscription management portal
- Provisioning and management of APIs with individual or batch transactions
- 2G, 3G, and 4G-LTE cellular as well as satellite coverage
- Support for all major U.S. and international wireless carriers
- Dual, geographically dispersed data centers
- Prompt, reliable Tier 1 level support from an expert staff available 24x7x365

IoT Network Connectivity Challenge

Establishing and maintaining connections, services, and rate plans with a wide range of network carriers, both domestically and internationally, is time-consuming and complex.

nxFAST Platform Network-as-a-Service

Manage multiple wireless services in a secure, all-in-one, easy-to-use portal.

Simplified Management of Your Network Services

Comprehensive Coverage

- Over 200 Countries
- Cellular and Satellite Coverage
- Multi-Carrier Support

Reliable, Scalable, and Secure

- Redundant Data Centers
- High Availability Architecture
- Secure, Reliable and Encrypted

Process Automation

- Powerful Interfaces
- Subscription Management
- Single and Bulk Transactions

Business Management Tools

- Usage Monitoring and Alerts
- Detailed Reports
- Extended Life-Cycle Support

NOC Network Operations Center

- 24x7x365 Support
- Proactive Systems Monitoring
- Staffed by IoT Specialists

Save Time and Resources With Network-as-a-Service
