

OM400™

Electronic Monitoring Device

Simple. Reliable. Accurate.

The OM400 combines simplicity with reliability and accuracy to deliver superior electronic monitoring results.

Simple

The OM400 is a versatile, one-piece, GPS/cellular ankle-worn electronic monitoring bracelet with 2-way communication. The OM400 was designed to track—and communicate with—all types of offenders 24/7, indoors and outdoors. The OM400 signals offenders using vibrations and sound, and receives offender acknowledgment in return.

The OM400 can pair with Numerex's optional OM400 RF Beacon to extend battery life and precisely verify in-home locations. OM400 uses the cloud-based software application, FocalPoint®, to map and track offender location.

Reliable

- Reduced false alerts compared to other systems
- Extensive store and forward capability in case of communication outage
- Tracks indoors and in GPS-impaired environments
- Mechanical shock and impact resistant
- Waterproof, submersible, dishwasher safe, temperature resistant
- Cut-free strap installation prevents false strap tamperers
- Advanced technology for more reliable location data
- Encrypted, secure communication

Accurate

- Superior battery life of 35+ hours
- One-piece design, tool-free installation
- Ankle strap is rugged, adjustable, reusable
- Minimal alerts, less management required
- Cellular and satellite signals for always-on, high precision tracking

"We service a large metropolitan area and expect the equipment from our vendors to be reliable and beyond reproach. The OM400 from Numerex does an excellent job of servicing our needs without issue."

—Sergeant Jason Wilson,
Las Vegas Metropolitan P.D.
